At the German Cancer Research Center (DKFZ) in Heidelberg, the research programs Tumor Immunology and Infection, Inflammation and Cancer are searching for talented PhD candidates.

The research program Infection, Inflammation and Cancer:
• Studies the role of pathogens and inflammation in cancer development
• Develops diagnostic approaches to detect cancer-relevant pathogens
• Designs treatment options and anti-cancer vaccines

For more information about the groups and their research, have a look here.

The research program Tumor Immunology:
• Investigates the development, function, and regulation of immune cells
• Determines the underlying mechanisms of immune diversity, plasticity and behavior
• Studies the role of the immune system in cancer, autoimmunity and infection as a foundation for innovative prevention and treatment options

For more information about the groups and their research, have a look here.

To apply online to the International PhD Program visit www.dkfz.de/phd

If you are interested in doing your PhD in the field of infection and immunology research, why not join the International PhD Program at the DKFZ?

Application deadlines
5th January and 31st May
