CORE FACILITY WORKSHOP

HANDS-ON HORIZON WORKSHOP

German Cancer Research Center (DKFZ), Heidelberg
ATV, Ground floor, room A0.106

The workshop will introduce the Horizon software by Lunaphore to analyze spatial proteomics data generated with the COMET system. Join us to discover how you can obtain actionable multiomic insights in just a few clicks.

Please indicate in the registration form (QR code) whether you will be able to bring your own Windows laptop with you. A confirmation will be sent prior to the workshop to notify participants what materials are required.
