

IN A NUTSHELL

The German Cancer Research Center

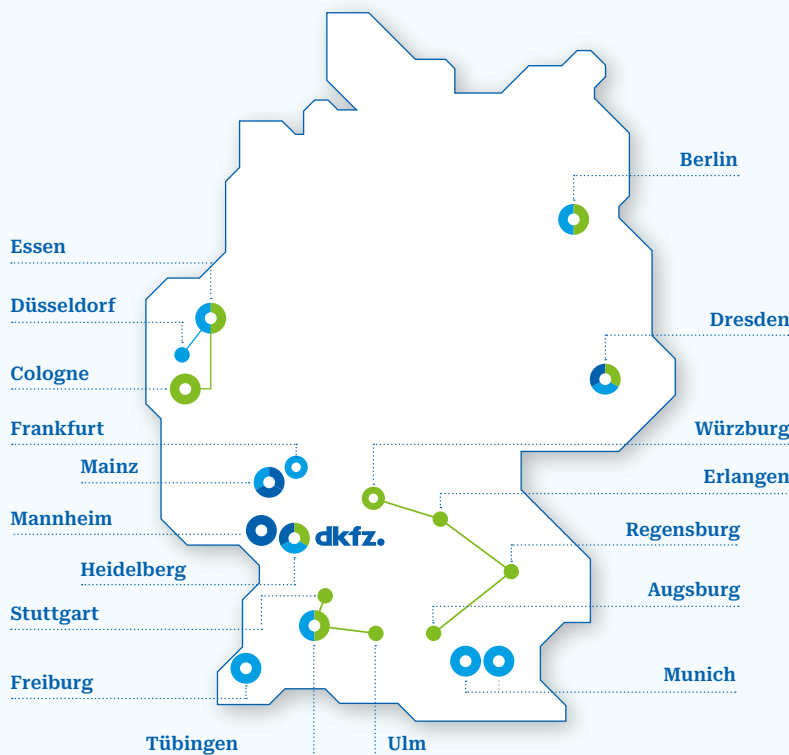

Our Research Topics

Cross-Cutting Topics across Research Areas

-  Digital Oncology
-  Biomedical Engineering and Technology Development
-  Prevention Research within the National Cancer Prevention Center (NCPC)
-  Preclinical Translation within the German Cancer Consortium (DKTK)
-  Clinical Translational Trials within the National Center for Tumor Diseases (NCT)

Locations of the DKFZ and/or translational centers

- DKFZ | German Cancer Research Center
- NCT | National Centers for Tumor Diseases
- DKTK | German Cancer Consortium

At the German Cancer Research Center (DKFZ), we conduct research for a life without cancer. Our goal is to better understand cancer, detect it early, treat it effectively, and prevent it whenever possible.

To ensure that our research benefits patients, we operate translational centers across Germany, in collaboration with excellent university hospitals and leading research partners:

- National Centers for Tumor Diseases (NCT, 6 sites, 11 UMCs)
- German Cancer Consortium (DKTK, 8 sites, 11 UMCs)
- Hopp Children's Cancer Center (KiTZ) Heidelberg
- Helmholtz Institute for Translational Oncology (HI-TRON) Mainz – a Helmholtz Institute of the DKFZ
- DKFZ Hector Cancer Institute at University Medicine Mannheim
- National Cancer Prevention Center (jointly with German Cancer Aid)
